Experience

Accenture Moscow – Technology consulting analyst

Worked in delivery service project (November 2020 till now):

- Identified requirements for business processes automation within the commercial team to boost project profit growth;
- Wrote user stories, business and functional requirements using BPMN notations and microservices interaction diagrams for a team of 5 developers and 3 testers in JIRA and Confluence; used Figma for interface prototyping;
- Consulted clients on REST API documentation, notified about new features; supported integration of ~200 companies (sellers and other delivery services) to the Order Management System;
- Created analytical Excel reports using PostgreSQL, Elastic search, Python to provide an overview of features performance;
- Worked with Scrum team: conducted refs and planning, organized end to end testing of completed features, conducted sprint reviews, demonstrated implemented task's workflow for stakeholders.
